106	AJA MOLA	06:35	Open		Italy	Gioacchino Cataldo, who passed away in July 2018, was a tuna fisherman in Favignana Island, in Sicily. Gioacchino's story is closely connected to Egadi Islands, to which Favignana belongs, and in particular to Stabilimento Florio, where he started to work really young. For 33 years he worked as tonnarotto and in 1996 he became rais of the fishermen (Arabic word meaning "leader"). He has been rais for 11 years, during the most difficult period of the tonnara, namely till 2007, the last year of tuna fishing in Favignana. In May tuna coming from Gibraltar swim towards warm beaches of Mediterranean Sea, where they reproduce. During the tuna fishing fishermen perform propitiatory songs; the most famous one is called AJA MOLA. This name comes from the Arabic ai ya mawla [ai aià maulà] (O my Lord). It is a responsorial song; the soloist's voice is echoed by the chorus of fishermen pulling their nets aboard. "Muciare" is the name of the dark ships used during the tuna fishing. The slow, strongly rhythmic pace accompanies the effort during the first phase of the surfacing of the nets. Because of his dissemination activity on the traditions related to this kind of fishing, in 2006 Gioacchino was recognised as "Living Human Treasure" in the register of Intangible Cultural Heritage of Sicily, a document aiming at safeguarding the cultural richness of the Island. Marcello Tramandoni's photographic report illustrates one of the last tuna fishing in Favignana Island and managed by the rais Gioacchino Cataldo, with the assistance of Clemente Ventrone, as vice rais.

The sun and the window offer this possibility of escape. To give life and survival to the round and the square is to imagine them in space. This extract from an interview with Victor Vasarely on February eighteen, one thousand nine hundred and sixty seven, was a source of inspiration for me: to give life to his rounds and squares and thus create my own universe in an imaginary space.
